S-series Push Button, Display, 1-Gang

SKU ASPB-01/D.S · Flush wall mounting

DESCRIPTION

KNX Secure push-button sensor with integrated status display, 1-gang. Live room feedback — temperature, humidity, air quality — above metal touch pads.

The S-series Push Button Sensor Display & Secure, 1 Gang features a 0.96" color LCD screen with 80x160 resolution and a slim 10.4mm panel. It integrates a temperature sensor, proximity sensor, and an RGB LED indicator for versatile feedback. Fully compatible with KNX protocols, it supports switch, dimming, shutter, scene control, RGB/RGBW/color temperature adjustments, multiple operations, delays, and logic functions with up to 8 group events. Designed for wall installation in standard 86x86mm, 80x80mm, or German round wall boxes, it operates solely on KNX bus power with 15mA consumption. Display modes include text, icons, or combined text-icon formats.
